DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. ***Claims 1, 3, 23, and 24*** are rejected under 35 U.S.C. 102(e) as being anticipated by Williamson et al (United States Patent 6,477,249), hereinafter referenced as Williamson.

Regard **claim 1**, Williamson discloses a communications signal splitter and filter. In addition, Williamson discloses a filter for filtering signals in a telecommunications system and for impedance matching to a predetermined complex impedance, wherein the filter has at least on first pass band, and wherein the filter is passive, and the characteristic impedance of the filter is complex so that it matches the predetermined complex impedance at least approximately, further wherein a thyristor, which reads on claimed "resistance", of the filter components assists in giving the characteristic impedance of the filter its complex character as disclosed at column 3, lines 1-25; at column 7, lines 22-50 and exhibited in figures 1, 3, 6 and 7.

Regarding **claim 3**, Williamson discloses everything claimed as applied above (see claim 1), in addition Williamson discloses wherein a thyristor, which reads on

claimed "resistance", is in series with the LPF, which comprises at least one inductance, and the resistance and the inductance assist in giving the filter the complex characteristic impedance, as column 7, line 22 through column 8, line 22 and exhibited in figures 6-8.

Regarding **claims 23 and 24**, they are interpreted and thus rejected for the reasons set forth above in the rejection of claims 1-3.

Allowable Subject Matter

2. **Claims 19-22** are allowed.

3. **Claims 4-18 and 25-29** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed March 24, 2004 have been fully considered but they are not persuasive. Specifically, regarding the passive filter the examiner respectfully disagrees, since the above cited rejection more than adequately meets the claim limitation. Further, regarding the resistor and the complex characteristic the examiner respectfully disagrees since the above cite reference more than adequately meets the claim limitations.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
